

Project Development Phase

Delivery of Sprint-4

Team ID	PNT2022TMID04728
Project Name	Smart Farmer-IOT Enabled Smart FarmingApplication

In Sprint-4 we are going to make the user interact with Software.

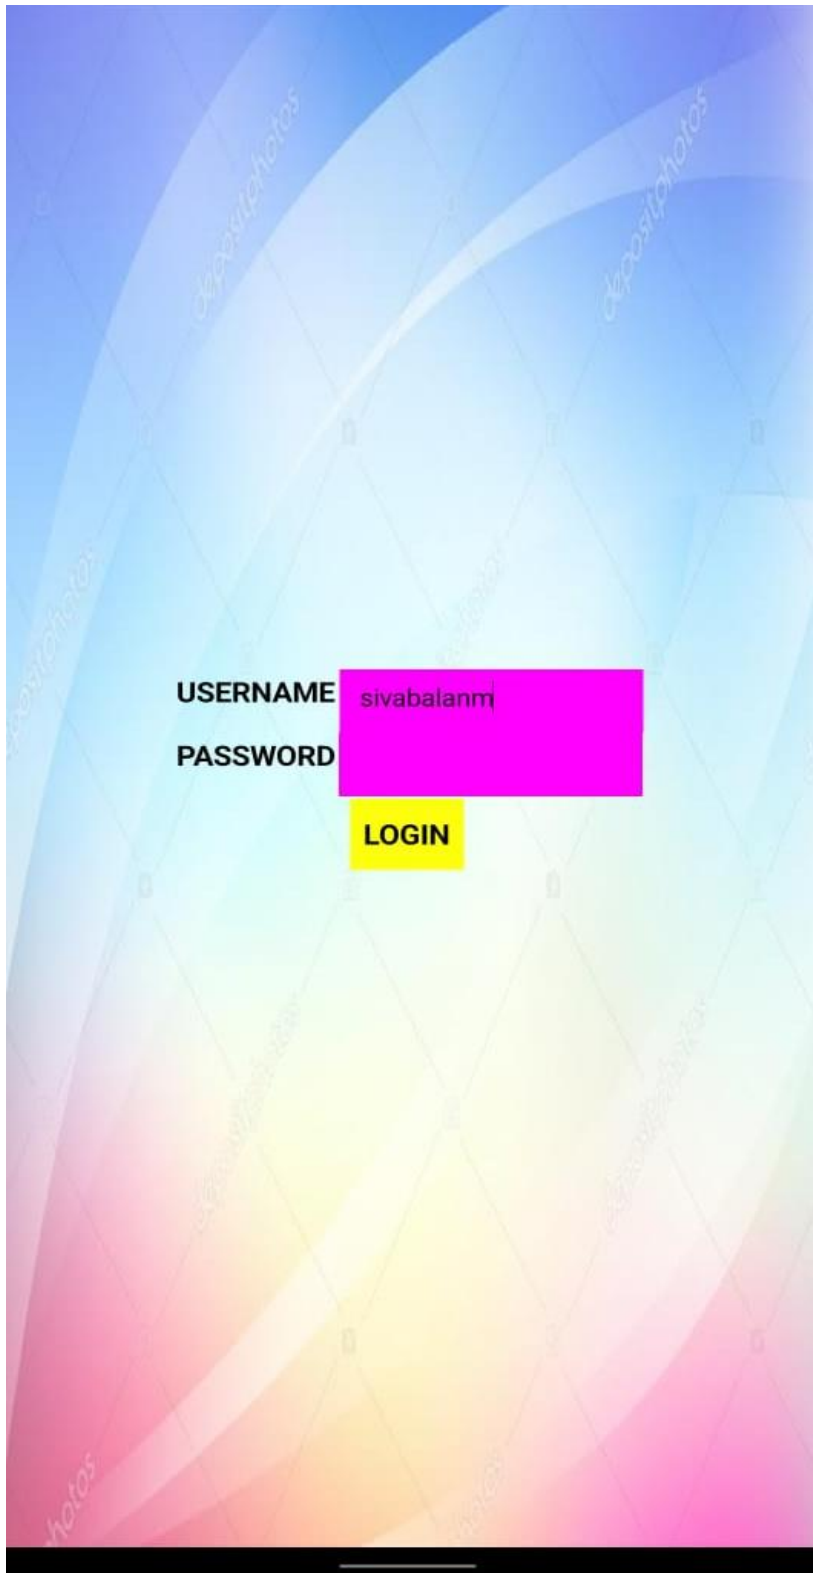

Step-1: First user need to download the android APK file from MIT app inventor where we developed our mobile application and install in their mobiles.

Step-2: After successful installation we can find app icon in our mobile as shown below.

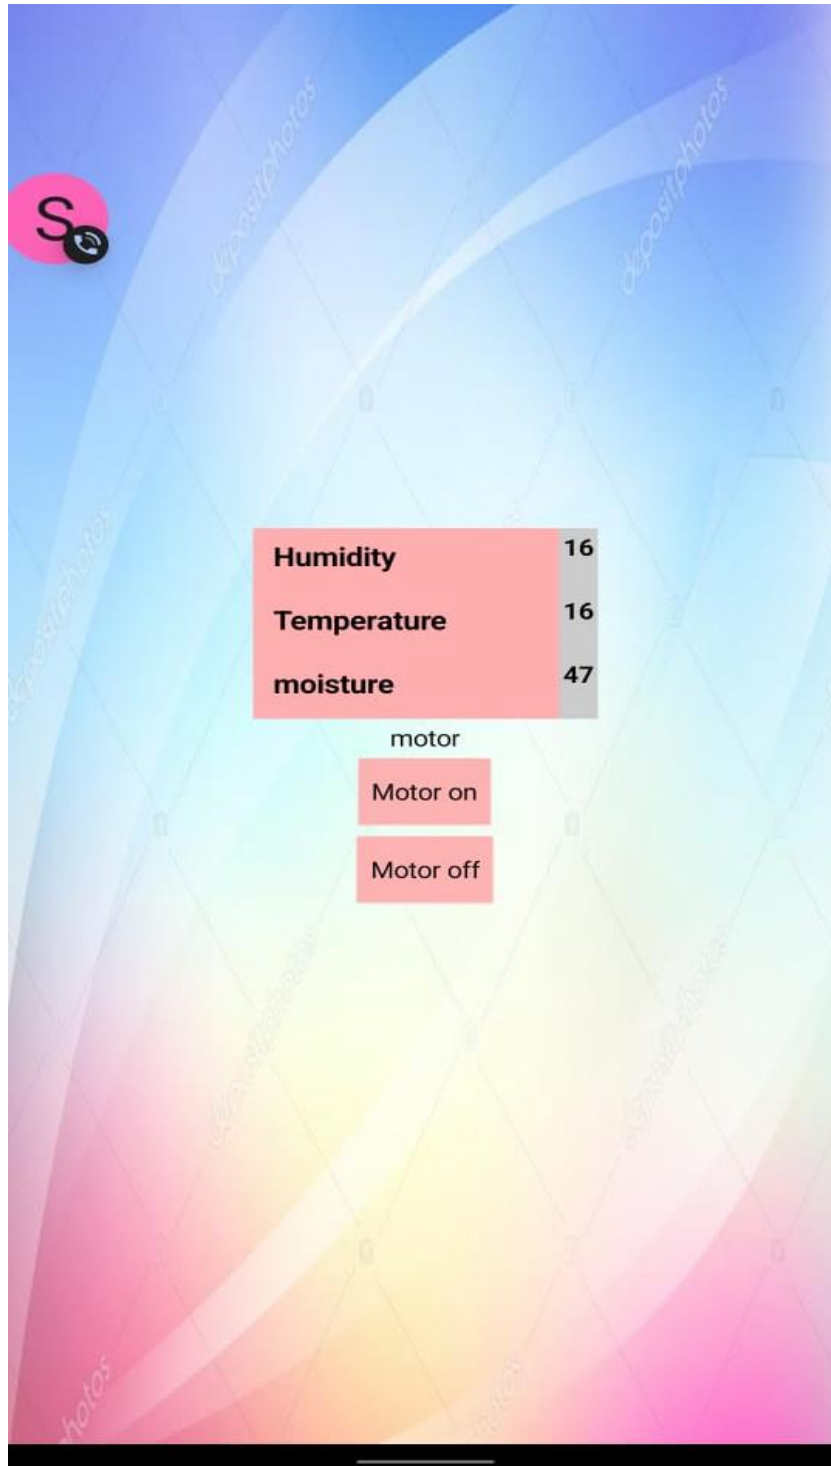

Step-3: After clicking the app icon it ask the user need to create username and password.so give username and password and click the signup button. The user can see interface like these as shown below.

The image shows a login screen with a vibrant, multi-colored background featuring a grid pattern. The text 'photos' is repeated diagonally across the background. The login form is centered and consists of the following elements:

- USERNAME** label followed by a text input field containing the text 'sivabalanm'.
- PASSWORD** label followed by a password input field (represented by a solid magenta rectangle).
- A yellow **LOGIN** button positioned below the password field.

Step:4 After successful login.The next page will be open. In that page we can see the real time temperature , humidity and soil moisture reading and motor ON and motor OFF control button also as shown below.

Conclusion: we are successfully created the IOT enabled smart farming application.
